

### **Enjoy Your Trial Account!**

We're so excited to have you trial FieroCode! You are welcome to create your trial account using the link below. Colleagues are also invited to create their own trial accounts. Your trial account will expire 30 days after you create it. If you need more time, reach out to your sales representative to extend the trial.

### **Trial Tips-**

#### **Tip #1:**

When you first create your account, you'll go through our "onboarding" sequence where you get introduced to the story (story-based learning) and do your first coding activity. Follow the directions and have fun with this!

#### **Tip #2:**

There are two types of content in our software. We call them "Workouts" and "Missions." Workouts are tutorials - where we teach students various coding concepts, such as how to do a loop in Javascript. Missions are projects, where students will use the various coding concepts they've learned to build real websites, video games, apps, animations, programs, and more. The Missions page will be empty until you complete some Workouts.

#### **Tip #3:**

There is so much good content in our software, but for the purposes of trialing, some good places to start in the Workouts are:

- Scratch, level 1
- HTML, level 1
- Javascript, level 1

#### **Tip #4: Have fun and enjoy your trial!**
